Notes & Details

The Hurakan HKN-BCCG59 Refrigerated Bakery Case is designed to present pastries, desserts, and baked goods in a clean and visually appealing way. Its curved double-pane front glass creates a premium look while ensuring a clear, unobstructed view of every shelf. Bright, energy-efficient LED lighting highlights each level evenly and enhances product visibility throughout the day.

Adjustable chrome-plated shelves allow flexible product arrangement and help create a structured and attractive display. The spacious interior provides ample room for high-volume merchandising while maintaining consistent temperature performance to keep items fresh and presentable.

The forced-air refrigeration system delivers even cold-air distribution across all shelves, ensuring stable temperatures and reliable performance during service hours. This helps pastries and desserts maintain their texture, appearance, and freshness.

Durable stainless steel construction and high-clarity glass panels make the unit suitable for continuous commercial use. The front-opening glass simplifies product rotation, restocking, and daily cleaning. Ideal for cafés, bakeries, supermarkets, and specialty retail, the HKN-BCCG59 combines visibility, performance, and long-term durability in a modern refrigerated display solution.
